### **Four new starters boost Support to Win's growth drive**

*Ops team grows in line with 2023 business expansion*

**16th February 2023**

Support to Win (STW) is pleased to announce the addition of 4 new starters joining its ranks this month as part of company growth plans for 2023.

The new operational positions add scale to both its projects and BAU teams, directly supporting the implementation of UCaaS and CCaaS projects on behalf of STW partners.

Julie Mills, CEO of Support to Win, said: "We are executing a plan for sustainable growth by adding four comparatively junior roles across our team in preparation for net new business in 2023."

"It's a tried and trusted formula of growing our own, recruiting excellent individuals who are new to the telecoms industry that we will nurture through our award-winning 'STW Academy' training programme."

The company also intends to grow headcount with experienced and proven professionals being appointed to a further 3 strategic roles by the end of the year.
